

Sepiogel TX

**Rheological additive for aqueous systems
- High efficiency with low concentration -**

Sepiogel TX imparts excellent thixotropic and pseudoplastic properties to the systems in which it is incorporated, reducing segregation and thickening the system.

Typical values

Chemical composition

**Sepiolite
Hydrous magnesium silicate**

Colour
Appearance

**light cream
fine powder**

Moisture
pH-value (6% distilled water)
Bulk density

%	< 18
	10.3
g/l	570

Particle size distribution, dry sieving

> 44 µm	14 %
-------------------	-------------

Particle size distribution, wet sieving

Sieve residue

> 44 µm	5,6 %
-------------------	--------------

Packaging

22 kg bags, 36 bags/pallet = 792 kg

Shelf life

Consume best before 1 year from manufacturing date
